

Strategy to Reduce Maternal Mortality in TamilNadu: **Warroom for Safe Motherhood**

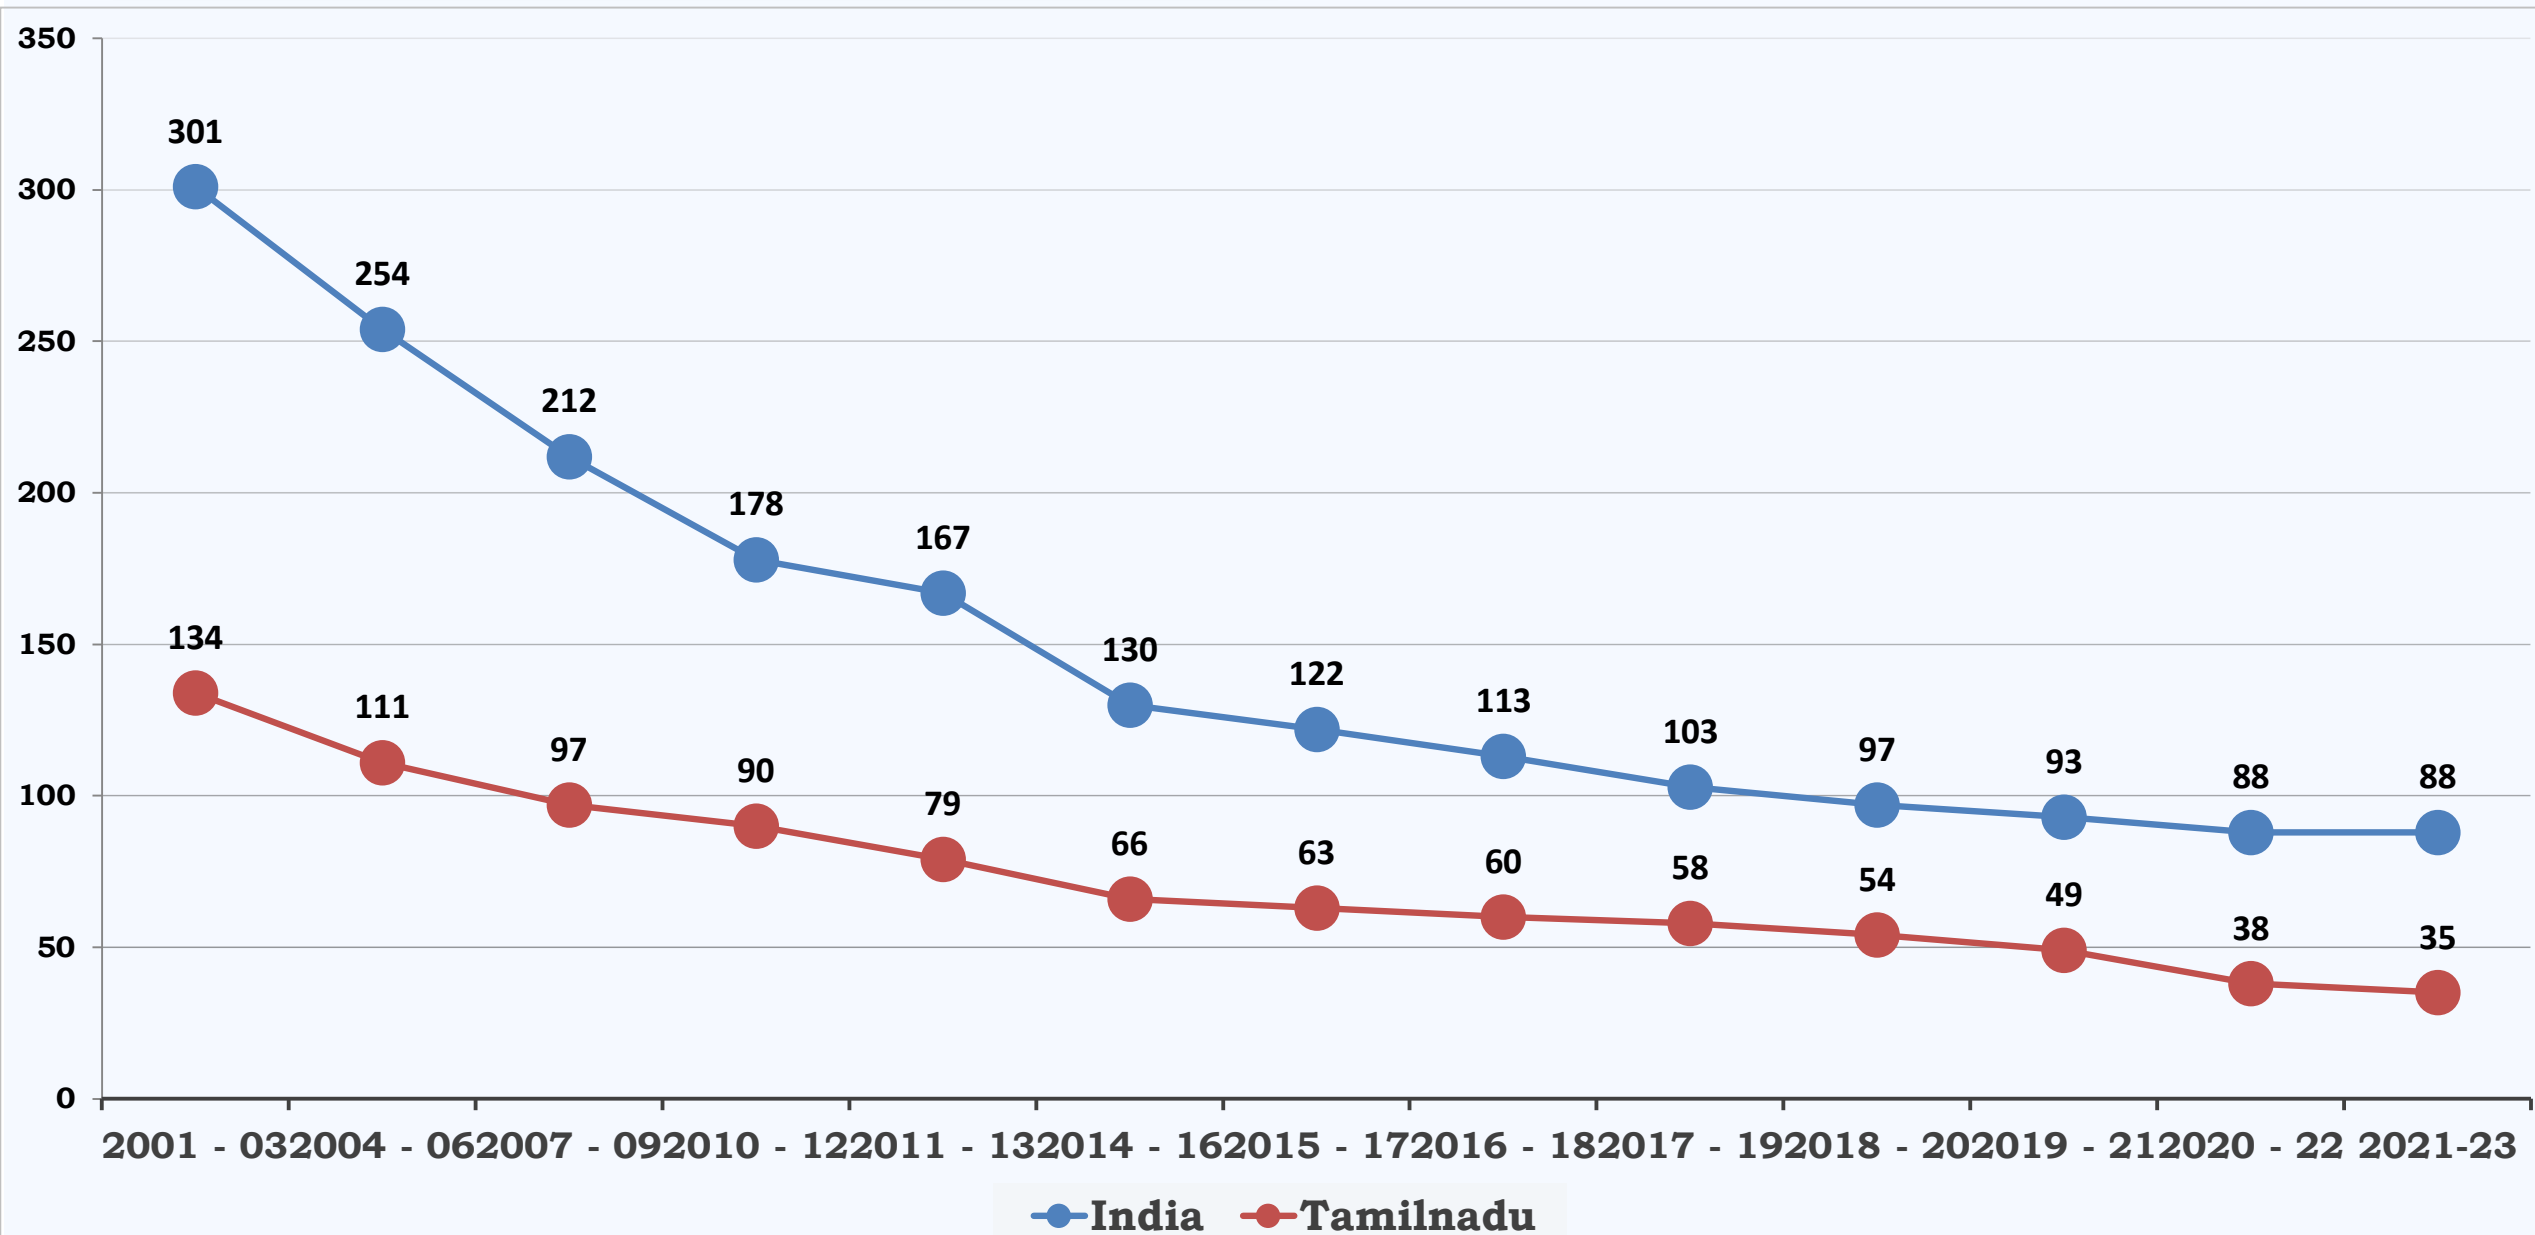

Implementing Comprehensive Approaches to Save Lives

Maternal Mortality Ratio

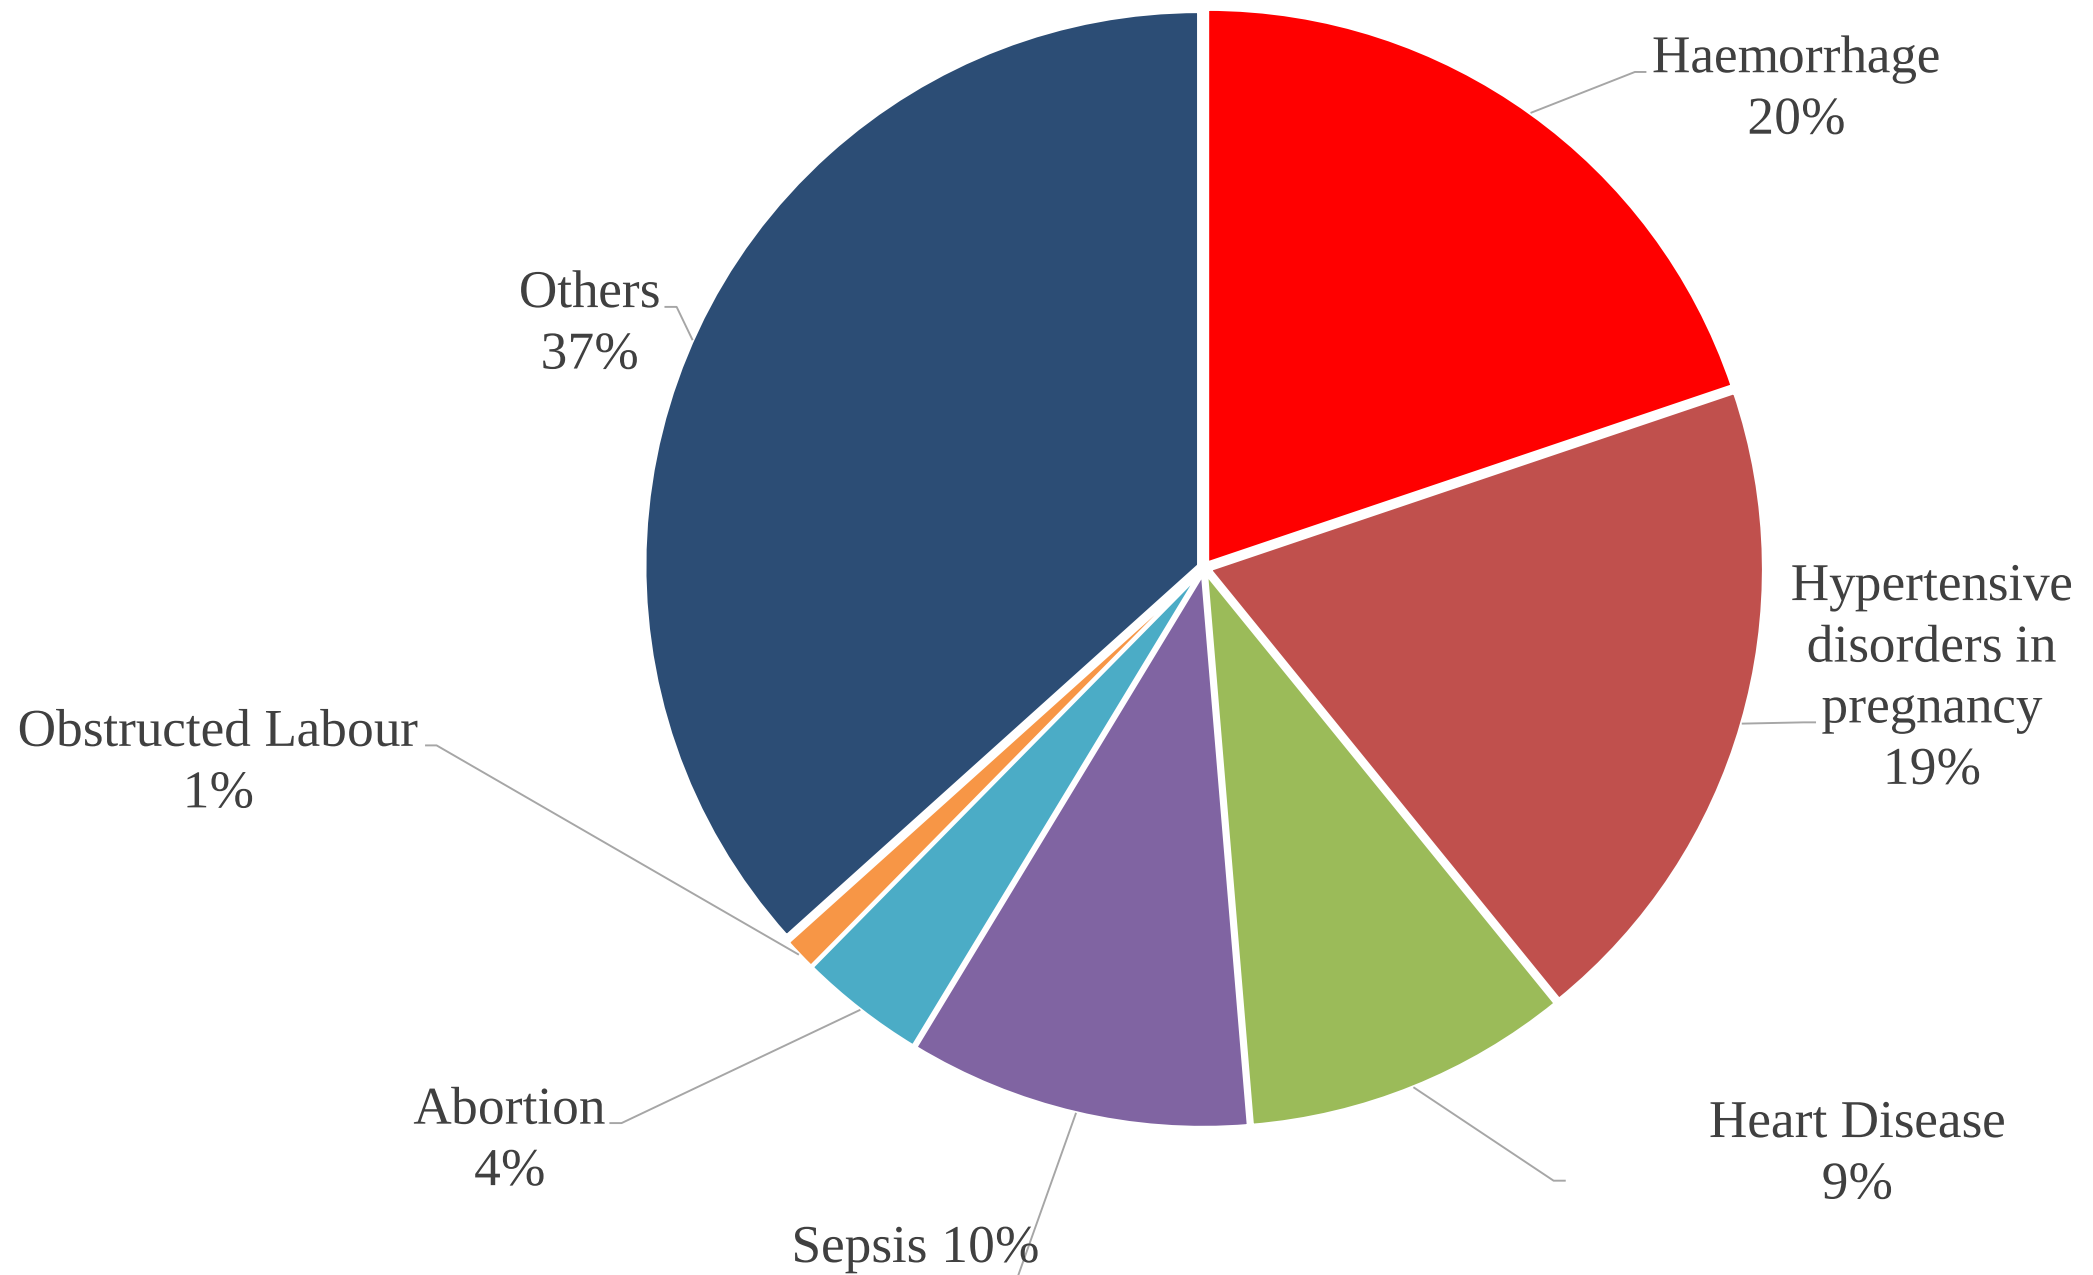

35 per 100,000 live births

Source: SRS (2021-23)

Causes of Maternal Deaths - Tamil Nadu

(2014-24)

⚠ Current Challenges

- HR Follow up
- Transition to Digitalization
- Coordination gaps

💡 Requirements for Success

- Targeted interventions
- Real-time monitoring
- Data integration across departments
- Inter Sectoral Co-ordination

Establishment of State War Room

Functions of State Level War Room

Pre-Birth Planning Mechanism

Comprehensive planning for **high-risk mothers** to ensure appropriate delivery facilities and **avoid unnecessary referrals**

Private Hospital Categorization

Classifying **private institutions into Level I, II & III** based on capabilities and emergency care services

Coordination with Call Centers

Collaborating with 102 State/District call centers for **follow-up** of Antenatal mothers and address **emergency response and grievances**

Capacity Building

Training and enhancing skills of healthcare providers for effective maternal healthcare delivery

High Risk Follow-up

Tracking and managing high-risk pregnancies through systematic flagging and timely interventions

Data Harmonization

Creating new variables, **stratification, collection and follow-up** of maternal health data across systems

Data Monitoring & Validation

Ensuring correctness and accuracy of data in **PICME** portal

2623 Birth Planning Help Desks established @ all delivery points

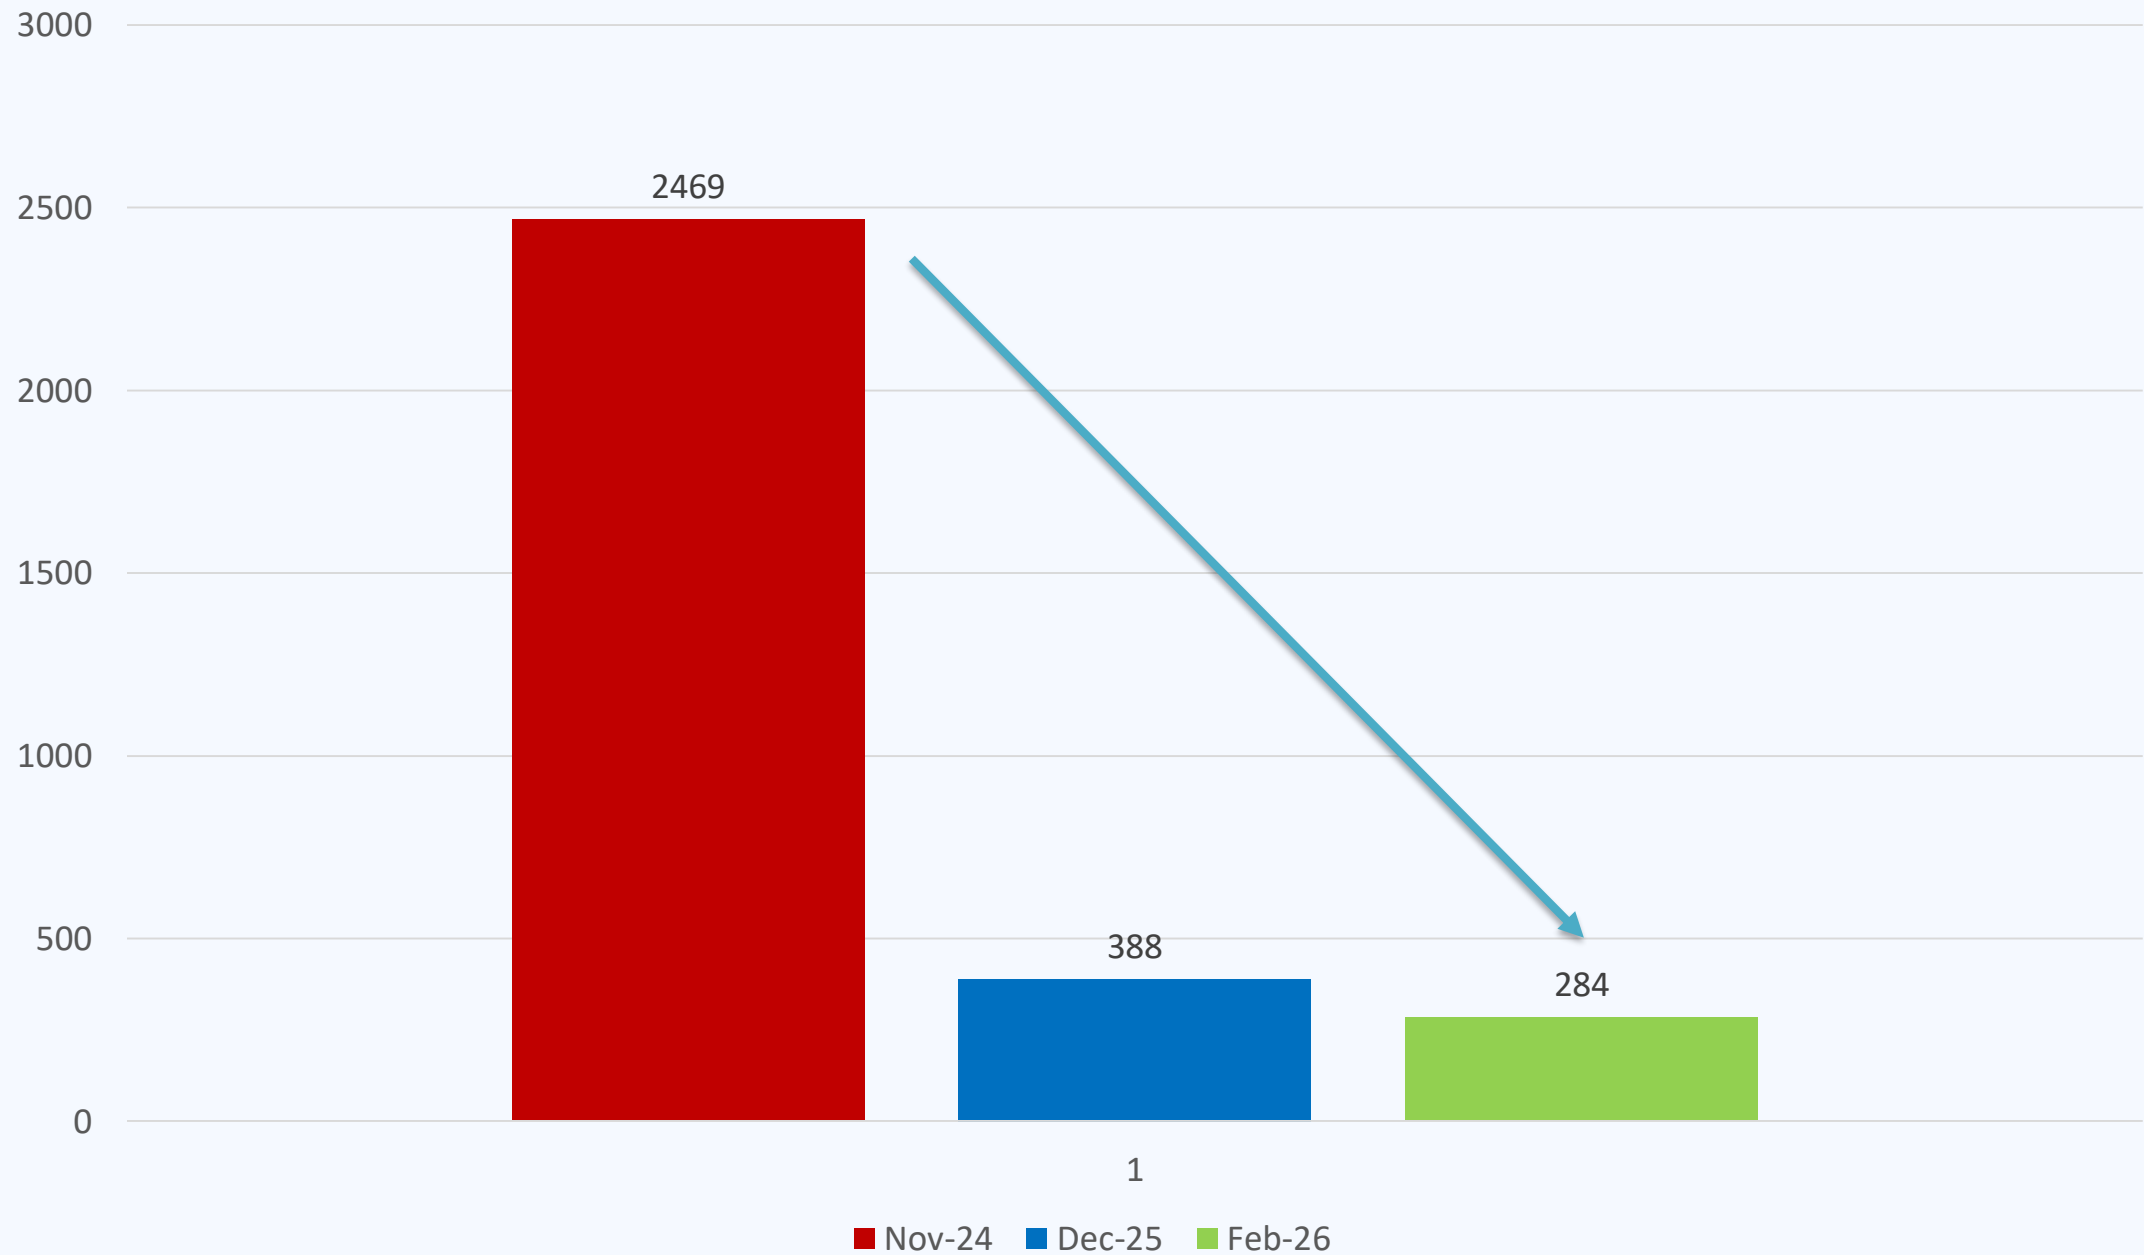

- ✓ 2 Staff Nurses & Data Entry operators
- ✓ Ensure entries in PICME portal
- ✓ HR Follow up

Comprehensive Pre-Birth Planning Mechanism

Reduction in inappropriate Birth planning

Co ordination & Integration with Private Hospitals & Referral Coordination

▲ 108 - Referral Coordination

- ✂ Birth Planning data is shared to 108, to avoid multiple referrals.
- ☑ IFT from Private Hospitals to Government is enabled

Categorization of private institutions

- Level-I (907 hospitals)
- Level-II (1284 hospitals)
- Level-III (249 hospitals)
- State level hybrid mode sensitization meeting conducted for Private Obstetricians
- Training for IMA and TNFOG, on “Convergence for Care” as PPP initiative

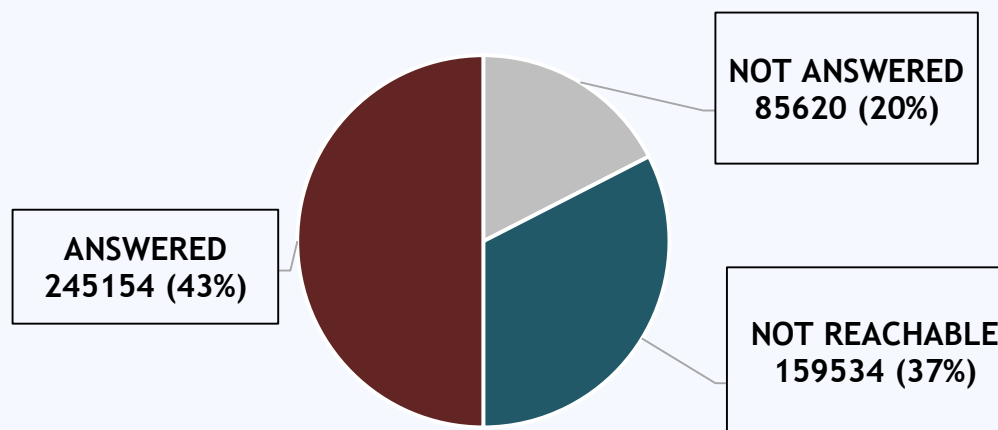

State Call Centre - 102

- 50 Counsellors at State - Inaugurated on 17.08.2024
- 2 calls are made to HR mothers after 37 weeks (2 & 4 weeks before EDD)
- 173126 Mothers reached by state

Calls made - 102 Help line (14 days prior to EDD)
(14th Dec, 2024 - 28th Feb, 2026)

HIGH RISK MOTHERS CALLED (4,90,308)

- Mother is fine ■
- Mothers needs continuous follow up ■
- Mother needs immediate attention ■

Calls are made to

- ✓ All AN HR mothers
 - ❖ 10 days before EDD
 - ❖ 21 days before EDD
 - ❖ 35 days before EDD
 - ❖ Once in 2nd Trimester
- ✓ Newly Identified HR mothers
- ✓ High Risk PN mothers
- ✓ Mothers not reached by 102

PICME Portal Revamping modification with new variables

- Scheduling visits of HR Mothers
- AN Visit Entries in portal
- Ensure treatment details are upto date
- Appropriate Birth Planning at patient's choice
- Real time data monitoring & Validation

Strengthening CEmONC services

- Improving Quality care
- Red Alert OBG Team for multi disciplinary Obstetrics ICU care
- Exclusive Obstetric Physician for ICU care of maternal cases
- Establishment of Post partum Clinics
- Training / hands-on workshop in protocols
- Revamped Maternal Death audits / Near Miss Audits
- Periodic CEmONC Co-ordination Meetings @ Districts
